

2022-2023

DUAL CREDIT ONLINE COURSE DESCRIPTIONS

- Because seated DC course taught at high schools may vary from year-to-year, they are not included on this list. I have provided a link to Drury University and Drury GO Academic Catalogs for additional course information.
- Some courses are not offered every semester.
- Students will have to reference the Online Course Lists located on the Dual Credit webpage or the lists can be provided by the high school counselor.

Course	Credit Hours	Course Description	COST
BIOL 100: Principles of Biology	3	This course introduces basic scientific terminology, biology, and chemistry. It is designed to prepare students for more rigorous science curriculum. <i>**For Drury: This course meets general education requirement for non-science majors. Will not satisfy biology major requirements.</i>	\$270.00
BIOL 130: Introduction to Bio-Medical Sciences	3	This course will teach students the basic biological principles of nutrition, pathophysiology, microbiology, pharmacology, and control of infectious disease as it relates to health and disease in humans.	\$270.00
BIOL 245: Introduction to Human Nutrition	3	A study of the essential nutrients and their value in the various food groups, their functions in the body, and how to determine the food needs of the individual.	\$270.00
BIOL 250: Foundations of Medical Terminology	3	This course examines the various aspects of medical terminology including word origins, definitions, spelling, and pronunciation.	\$270.00
COMM 211: Presentational Speaking	3	Principles and practice of effective oral communication. This course focuses on researching, composing, and delivering formal and informal presentations. Topics include ethics and public speaking, listening, research, analyzing and adapting to audiences, message construction, outlining, delivery of message, effective use of visual aids and critically evaluating public address. The course emphasizes informative and persuasive speaking. Designed for students who seek speaking and critical thinking skills.	\$270.00
CRIM 120: Principles of Criminal Justice	3	A survey course designed to familiarize students with the American system of criminal justice, theories of crime causation, and society's response to crime. The course provides a general overview of the agencies responsible for the administration of justice by examining the history, structure, and functions of law enforcement, the judicial system, and corrections.	\$270.00
ENGL 150: Composition	3	Writing course designed to develop students' abilities to write in a variety of modes for a wide range of purposes.	\$270.00
ENGL 200: Literature Matters	3	One of three foundational courses for majors and potential majors in English, Literature Matters introduces students to a central set of problems in contemporary literary studies (for example, Identity and Empire, Shakespeare to Ondaatje). The course includes important canonical works as well as neglected or emerging writers. There is a focus on how to read and understand literature; how reading and writing literature influence identity, meaning, and value; and how to develop strategies for reading, discussing, and writing about literary works.	\$270.00
ENGL 207: Expository Writing: Art of the Essay	3	A foundational course for the writing major, Expository Writing provides students with valuable opportunities to write in a wide variety of modes of nonfiction, including narrative essays, film and book reviews, cultural analyses, and journalistic essays. Students read and discuss the work of published nonfiction and participate in workshops where they respond to one another's writing in small groups. The workshop format enables students to respond to issues of form, purpose, voice, and audience. <i>(Meets Creativity Explored)</i> Prerequisite: ENGL 150.	\$270.00
ENGL 266: Creative Writing I - Fiction	3	Students learn techniques for and practice in writing fiction. The course focuses on student workshops.	\$270.00

ENGL 268: Creative Writing I – Non-Fiction	3	Students learn techniques for and practice writing nonfiction.	\$270.00
GSTU 110: Foundation of College & Professional Success	2	This course will introduce students to the principles and tools which will enhance their effectiveness as students and professionals. Topics will include information literacy and research, online tools and the learning management system, academic integrity, time management, professionalism, and career development.	\$180.00
GSTU 210: Desktop Applications	3	This course focuses on the use of advanced software application using the latest Microsoft Office software. Students will produce comprehensive, real-world solution to solve business related problems. Student will utilize Word, Excel PowerPoint application and Internet resource.	\$270.00
HIST 101: United States History to 1865	3	A broad survey of the major political and social developments from the time of Columbus to the Civil War.	\$270.00
HIST 102: United States 1865 to Present	3	A broad survey of the major political and social developments from the Civil War to the present	\$270.00
HIST 107: World History to 1500	3	A survey of world history with a focus on the nature of changes in global frameworks and their societies. It emphasizes relevant factual knowledge, leading interpretive issues, and skills in analyzing types of historical evidence.	\$270.00
HIST 108: World History from 1500	3	A broad survey of world history from 1500 to the present. Exploration of various modern world cultures with a focus on connections and conflicts between them.	\$270.00
LDST 101: Foundations of Organizational Leadership	3	General introduction to, and analysis of, historical and current theories of leadership. Study of leadership process involving interaction of leaders and followers in organizational settings such as public/private, profit, non-profit, and student organizations.	\$270.00
LDST 102: Project Management	3	The course covers key components of project management including project integration, project scope management, project time and cost management, risk management, quality management, human resource considerations, and procurement management.	\$270.00
MATH 109: College Algebra	3	A study of functions and graphs, solutions of equations and inequalities and the properties of polynomial, rational, exponential, and logarithmic functions. <i>It is strongly recommended that students have completed one year of high school algebra and one year of high school geometry or MATH 100 to be successful in this course.</i> *Tuition for this class is reduced. Students purchase their book online.	\$190.00*
MATH 110: Trigonometry	3	The study of trigonometric, logarithmic, and exponential functions and their applications. <i>It is strongly recommended that students have completed two years of high school algebra and one year of high school geometry or MATH 109 in order to be successful in this course.</i> *Tuition for this class is reduced. Students purchase their book online.	\$190.00*
MATH 211: Pre- Calculus	4	This course is designed to prepare students for Calculus I. It covers a variety of topics from algebra, with emphasis on the development of rationale, exponential, logarithmic, and trigonometric functions including their essential properties, graphs, and basic applications. Additional topics range from linear systems to conic sections. *Tuition for this class is reduced. Students purchase their book online.	\$280.00
MATH 227: Introduction to Statistics	3	Prerequisite: One year of high school algebra. A course to acquaint the student with the basic ideas and language of statistics including such topics as descriptive statistics, correlation and regression, basic experimental design, elementary probability, binomial and normal distributions, estimation, and tests of hypotheses and analysis of variance. <i>It is strongly recommended that students have completed one year of high school algebra to be successful in this course.</i> *Tuition for this class is reduced. Students purchase their book online.	\$190.00*
MATH 231: Calculus I	4	A study of the fundamental principles of analytic geometry and calculus with an emphasis on differentiation. *Tuition for this class is reduced. Students purchase their book online.	\$280.00
MUSC 115: Introduction to Music	3	This is an introductory course in the music of western culture for non-music majors, designed to help students listen to music in greater depth and to acquire a basic knowledge of the musician's technique and vocabulary. Although the material	\$270.00

		emphasized in the course will be western art music, the listening and evaluation skills developed during the course can be applied to any musical genre.	
MUSC 161: Concert Choir	1	Currently being developed.	\$90.00
MUSC 164: Marching Band	1	The Dual Credit Drury University Concert Band allows students to rehearse and perform literature written and developed for the band. Students continue to hone both their musical skills. Self-reflection and continued emphasis on improvement are centerpieces of this course. Students must participate in the band in their home school in a concert band setting.	\$90.00
PHIL 105: Introduction to Philosophy	3	A comparative and critical study of the major philosophic positions with a view to developing the analytic, synthetic, and speculative dimensions of philosophical methods.	\$270.00
PLSC 101: Government and Politics in the United States	3	Introduction to the theories, constitutional bases, functions, and government structures of the U.S. political system. Emphasis on national politics and linkages with state and local governments with particular emphasis on Missouri, including current issues in domestic and foreign policy.	\$270.00
PSYC 110: Stress Management	3	The philosophy and comprehensive approach to stress reduction through the re-establishment and enhancement of the state of well-being.	\$270.00
PSYC 120: Principles of Psychology	3	This introductory survey course provides a broad-based overview of the field of psychology as a scientific discipline. Topics include theoretical perspectives, research methodologies, biological bases of behavior, developmental milestones, learning and memory, motivation and emotion, personality, social psychology, and psychological disorders.	\$270.00
PSYC 235: Applied Human Development	3	The course provides an overview of physical, cognitive, social, and emotional milestones from conception through death. Emphasis is given to the ways in which biological, familial, sociocultural, and diversity factors interact to influence developmental trajectories.	\$270.00
RELG: 109 Introduction to the Study of Religion	3	Religion and religious ideas are central to all cultures and societies, including our own. This course will look at the broad range of cultural forms we have come to call religion, examine how these forms shape cultures and societies, and finally, by examining what these forms have in common and how they differ, we will determine what it is we study when we study religion.	\$270.00
SOCI 120: Principles of Sociology	3	This introductory course provides a broad-based overview of the field of sociology. Attention is given to the ways in which social factors affect how institutions and organizations operate, to include race, ethnicity, gender, age, education, social class, and geographical space.	\$270.00
