Going straight into your career?

- Come up with a plan NOW instead of in the spring!
 - What do I want to do?
 - Is this a career/could this turn into a career?
 - Job: Just pays the bills
 - Career: Room to advance, and potential to increase your income
 - Read and reflect:** Settling for a job rather than a career can leave you feeling unfulfilled in the future. Earning money sooner rather than later is nice, but is that where you want to be/what you want to do in the future? It might be worth going to a school or doing an apprenticeship to learn the skills you need for a career you will enjoy.
- THINK! What am I going to do with my money? How can I be responsible and save/invest well for the future?
- Explore job opportunities, and check to see what the job requires (education, experience)
- Create a resume!
 - **Steps to follow:**
 1. Find a job opening (online, word of mouth, etc.)
 - a. Find out how to apply (in person, online)
 2. Create, or update, your resume
 3. Create a cover letter
 4. Submit application
 5. Interview for the job
 - **Tips...**
 - Clean up your social media
 - Follow up after the interview (email or "Thank You" card)
 - Find someone doing what you want to do. Ask them how they got there, and if you can see what it's like (job shadow, apprenticeship, open positions)
